- 10mm TEMPERED SAFETY GLASS

InvisiRail.com

Get the look you've always wanted

You've worked hard to create that view. Choose InvisiRail for the best sight lines while providing safety and security for your family.

Our 10mm thick safety glass is tempered and heat soaked for strength and durability, engineered for building code compliance.

With 23 standard panel sizes and customizable options, we can design a system to fit virtually any deck.

• SS INVISIPOSTS
  AND EXISTING WOOD POSTS
• SS CONNECTORS
• 10mm TEMPERED SAFETY GLASS

Make the most of your view

InvisiRail is the only glass railing system on the market that can span up to six feet with a single panel. With the lowest profile post and no top or bottom rail you experience the ultimate in wide open viewing.

Add our 25-year warranty, immediate delivery and ease of installation and the choice is clear!

• SS CONNECTORS
• 10mm TEMPERED
  SAFETY GLASS

Many top rail options available

- SS INVISIPOSTS
- SS CONNECTORS
- 10mm TEMPERED SAFETY GLASS
- 42mm SS TOP RAIL

Some jurisdictions are now mandating a top rail with glass guard rails. We've engineered a complete top rail system that can be included or retrofitted onto our railings.

Strong stainless steel brackets attach to the posts to secure a secondary fail-safe rail in the event of a glass panel being shattered.

Choose our elegant stainless steel piping or use your own pressure-treated, cedar or composite board. All options are building code compliant.
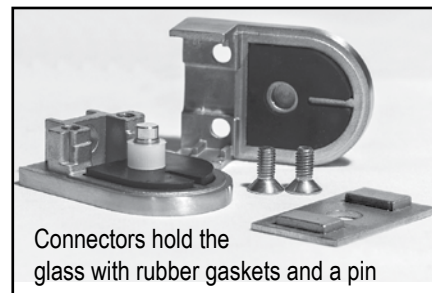

Hardware and connectors

Multi-angle adapter accommodates any angle required up to 95 degrees

All our stainless steel connectors and accessories are 316 grade steel and have undergone a passivation process to further enhance corrosion resistance.

Our nuts, bolts and connection hardware are also 316 steel ensuring that you will enjoy years of trouble free performance.

Connectors hold the glass with rubber gaskets and a pin

45 degree angle wedge

Spacer blocks allow standard panels to fit virtually any opening

Spacers are stackable and available in thicknesses of 3/8", 1/2", 3/4" & 1"

Lite10 nylon connectors

Our Lite10 hardware provides a more affordable option.

Available in black, white or cedar, they can attach to any flat surface.

Stackable wedges can handle angle combinations in 11.25 and 45 degree increments.

Lite10 spacers are stackable and available in widths of 1/4", 3/8", 1/2" and 3/4".

Versatile post options let you achieve the look you desire

- SS CONNECTORS ON EXISTING WOOD POSTS
- 10mm TEMPERED SAFETY GLASS

Care and Maintenance

In most applications, stainless steel will not rust or stain. However, when stainless steel comes in contact with chloride salts, sulphides or other rusting metals, it can discolour or even rust and corrode.

To maintain the beauty and function of stainless steel for years to come you must:

• Clean stainless steel with soap and water
• Never use mineral acids, bleaches or coarse abrasives
• Always remove stains or tarnish as soon as possible with either soap and water or a stainless steel cleaner like Barkeepers Friend or CitriSurf .
